## LOW TEMPERATURE PHYSICS II / K&Auml;LTEPHYSIK II

 Springer

Book Condition: New. Publisher/Verlag: Springer, Berlin | 71 For a given value of  $I$  the field is independent of the geometrical composition of the coil inside the winding space. The actual number of turns and the cross section of the conductors is entirely determined by the impedance of the power supply to which the magnet should be adapted. In the case of low impedance (high current and low voltage) few turns of thick metal should be used. In the case...
