By British Astronomical Association

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: .but, as in the case of the promontory, the brightness may be subjective, seeing that it is necessitated by the theory of contrast. Eden.-- Slightly shaded in all but the earlier drawings (Molesworth). Thymiamata.--The region between Gehon and Indus would seem to have changed in tone during the apparition. Thus, on January 5 Atkins found Thymiamata shaded near CM., and very yellow. It was also shaded on March 16, but, very bright on March 21 between CM. and terminator. Kibbler drew it white on April 28. Molesworth only very slightly shaded. Late in the apparition it was slightly shaded N. of Cantabras; the portion S. of Cantabras appearing as a bright circular patch. Phillips saw the whole area shaded on January 5 (Plate III., Fig. 1). The bright circular patch on S. end of Thymiamata, to which Molesworth calls attention, was seen also by Atkins. Aeria...
